

## Our Vision

Our vision builds on our motto of '*The best that I can be*' that already permeates the school along with our Core Christian Values of respect, forgiveness, friendship, compassion, truthfulness and perseverance. We need to anticipate the future and build confident, resilient children ready to embrace the opportunities and challenges of secondary school and beyond. Developing creative, articulate, resilient, empathetic, reflective and self-aware children will ensure they make excellent progress and maximise their individual talents.

Our school is committed to developing our staff as well as our children, offering opportunities for further development of their skills and talents. We take staff wellbeing seriously and endeavour to create a supportive atmosphere in which all staff feel valued and can thrive.

Our school will work closely with parents and carers to maximise their impact on their children's learning. We will continue to explore the potential for collaboration with the wider community and other schools to enhance the experience of our children and staff.

By implementing the vision:

- Our children will be inspired to develop a lifelong love of learning;
- Our staff will be inspirational practitioners who create memorable learning experiences for our children;
- Our children and staff will develop the character to achieve their very best, in order that they fulfil their ambitions whilst having a positive impact on society;
- Our children and staff will develop their own wellbeing in order to be prepared for future challenges;
- Our children and staff will reflect Christ's love in the world through their actions.
